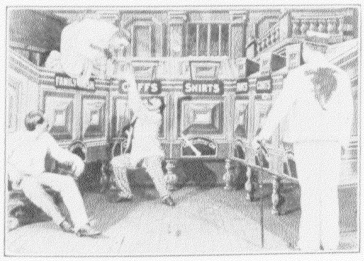
The Automatic Laundry

LENGTH, 361 FEET.

This Film shows the latest and greatest invention of the age. All you have to do is visit the new establishment and you come out with your laundry and clothes washed, ironed, and fixed up like new. The proprietor takes off your clothes as by magic and throws it on you in the same way.



A tramp who visits the establishment needs not only washing of his clothes but also a good washing himself, so the proprietor thinks. He therefore throws him in the compartment marked "family washing" after which the tramp comes out a perfect dude.
